General Information

Interest coverage ratio (ICR)

The gross rental income from the property should equal or exceed the ICR as determined using a combination of the tax band applicable to an applicant's income and the property type. The tax band applicable to the applicant with the highest income will be used. This will be calculated using the amount requested, at either the product charging rate plus 2% or 5.5%, whichever is the greater. The exception to this rule will be 5 year fixed rate products, which will be calculated using the amount requested, at either the product charging rate or 4.00%, whichever is the greater. The applicable ICR rate will be shown against each product. For limited liability partnerships, the tax band appropriate to the applicant (member) with the highest income will be used.

		Property type	
		Single self-contained unit (SSC)	House in multiple occupation (HMO), Multi-unit block (MUB) and all other property types
TAX STATUS	Limited company	125%	130%
	Basic rate tax payer (20%)	125%	130%
	Higher rate tax payer (40%)	140%	145%
	Additional rate tax payer (45%)	140%	145%

We must be satisfied that the applicant(s) are able to withstand increases in mortgage interest rates, cover rental voids and be able to afford the mortgage now and after any fixed period expires.

Future affordability

To cater for the PRA affordability regulation, we will require a fully completed property schedule on all applications before we can carry out our underwriting assessment. Depending on the profile of the case, we may also ask for a business plan and cash flow forecast (PDF versions of these documents can be found on our website). We will also need to ask for more information about your customer's income to enable us to apply the appropriate tax band and ICR to the affordability assessment. This product guide sets out how all future applications will be assessed, and at what rate and ICR.

Advance

Up to 80% LTV	Up to 75% LTV	Up to 70% LTV	Up to 65% LTV	Min loan	Max aggregate loan	Min income	Min age	Min term	Max term

A maximum aggregate borrowing above £5,000,000 may be considered on a bespoke basis, subject to a maximum aggregate LTV of 70%.

Consumer buy-to-let

We will not consider portfolio applications that qualify as consumer buy-to-let mortgage contracts.

Paragon customer placement

Applications for limited companies, limited liability partnerships, HMOs and multi-unit blocks must be submitted through the Paragon portfolio application process, even if the customer is classified as non-portfolio under PRA regulation.

The above table includes a non refundable application fee of £150.

The mortgage valuation report is a Security Assessment carried out for the benefit of Paragon Banking Group to determine if a property provides acceptable security for mortgage purposes. A valuation fee will be charged at application stage in accordance with the fee scale shown above. Where an internal inspection has been carried out and the proposed security is subsequently declined, a valuation report will not be made available although a summary will be given advising why the property is deemed to be unsuitable. In these circumstances the valuation fee is non-refundable.

In conjunction with other criteria, we will assess the affordability of a mortgage based on the expected monthly income generated from letting the property to a tenant. The actual income generated may be different and can be influenced over time by changes within the rental market. The applicant(s) will remain responsible for meeting the costs of the mortgage and the additional costs associated with letting property for the duration of ownership. Please refer to Paragon's Portfolio lending guidelines and submission requirements for full criteria.
